Summary

Developer with experience in CI,Laravel, VUEJS. Fluent with REST API, CLI background tasks. Have good communication skills and pre-intermediate level of English. Good team player, a guy who responsible for his code and worry about the life of the project. Fast learning. Follower of clear code, S.O.L.I.D. and microservices (alas, there was not much experience). Love to attend conferences.

Experience (Last 2)

Uvocorp, Software engineer

Ukraine, Kiev (01.04.2016 to present)

Development in due time. Support and refactor existing code.Writing new modules and functionals for the system. Correcting bugs.
